PROFESSIONAL SUMMARY

Final-year Information Science and Engineering undergraduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, and Computer Networks. Solved **700+** coding problems. Experienced in developing scalable full-stack applications using JavaScript, React.js, Node.js, Express.js, REST APIs, WebSockets, and MongoDB. Passionate about software engineering, distributed systems, and building reliable, high-performance products while continuously learning and collaborating to solve real-world problems.

EDUCATION

RNS Institute of Technology	CGPA: 7.88 / 10
<i>B.E. - Information Science & Engineering</i>	<i>2023 – 2027</i>
KLE Independent PU College Chikodi	90.50%
<i>12th PUE Karnataka</i>	<i>2023</i>
Bharatesh Composite PU C Bellad Bagewadi, Hukkeri	97.12%
<i>10th KSEEB</i>	<i>2021</i>

SKILLS

Languages:	C, C++, JavaScript, SQL, HTML, CSS
Frameworks & Libraries:	React.js (Vite), Node.js, Express.js
Web Tech & Databases:	MongoDB, PostgreSQL, Prisma, REST APIs, Socket.IO, WebSockets, Yjs
Developer Tools:	Git, GitHub, Docker
Core Concepts:	Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Operating Systems, DBMS, Computer Networks, Problem Solving

PROJECTS

FlagForge (Feature Flag Platform) — *React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Docker* [Live](#) [GitHub](#)

- Engineered a full-stack **feature flag platform** enabling controlled feature releases through **targeting rules**, **environment isolation**, and **percentage rollouts**.
- Implemented deterministic **SHA-256 user bucketing** and validated a **10% rollout across 10,000 users, 10.27% actual distribution**.
- Developed a **runtime evaluation API** with **environment-scoped API key authentication** and built a lightweight **TypeScript SDK** for integrating feature flags into backend applications.
- Designed modular **REST APIs** using **Express.js, PostgreSQL, and Prisma** with **JWT authentication**, resource ownership authorization, and activity tracking.
- Deployed the platform using **Vercel, Render, and Neon PostgreSQL** and benchmarked the evaluation API with **100 requests at 10-request concurrency**, achieving **100% successful evaluations** and **6.06 evaluations/sec**.

Real-time Collaborative Code Editor — *React.js (Vite), Node.js, Socket.IO, Yjs, WebSockets* [GitHub](#)

- Developed a collaborative editor supporting concurrent multi-user editing.
- Implemented **CRDT-based** synchronization using **Yjs** to ensure eventual consistency.
- Designed low-latency communication channels with **Socket.IO** and **WebSockets**.
- Achieved **conflict-free** collaborative editing through distributed synchronization mechanisms.
- Enabled real-time code sharing among multiple users.

ACHIEVEMENTS

- Solved **700+** Data Structures & Algorithms problems across LeetCode, Codeforces, and CodeChef.
- [LeetCode](#) – Achieved **1600+** Rating.
- [Codeforces](#) – Attained a Max Rating of **1106**.
- [CodeChef](#) – Achieved **2-star** rating (**1400+**).
- [Codolio](#) – **90+** contests attended across coding platforms.

ASSESSMENTS & CERTIFICATIONS

Algorithms for Searching Sorting and Indexing University of Colorado Boulder
Achieved an aggregate of 96.35/100 focusing on Data Structures and Algorithms.

C++ Programming TUF
Completed certification focused on foundational and advanced C++ Programming skills.
